Subject: Re: Governor Cooper Urges EPA to Set Limits for Emerging Contaminant GenX

Caroline,

Got your request. The following is attributable to me as spokesman:

“Families deserve to have confidence in the safety of their drinking water and forcing them to rely on bottled water indefinitely is not an acceptable long-term solution. The best solution would be for Duke to hook the families affected up to public water. In the meantime, the Secretaries of DEQ and DHHS are convening the Science Advisory Board to find a real solution based on science so no more families have to second-guess their drinking water.”

Thanks,

Ford Porter
